

Debagger

**Laitram
Machinery**

The Debagger is ideal for use in seafood industries.

Contents of packaging pass through the drum's sieve for further processing.

The Debagger automatically opens and sorts contents from packaging, reducing the labor needs of processors. The system is ideal for use industries where bulk-packaged items are emptied and separated for additional processing.

QUALITY MAINTENANCE AND EASY OPERATION

Sealed packages of product are transported through the Debagger via conveyor belt. A rotating cutter makes very fine cuts in the packaging without damaging the quality of the contents. Packaging and contents are then disassembled in a separation drum, and de-packaged contents are conveyed away for further processing. Remaining packaging is conveyed into a separate waste container.

Electronic sensors on the Debagger automatically register operational errors, aiding plant personnel to ensure production efficiency and personal safety.

LAITRAM QUALITY

Since 1949, Laitram has been a supplier of food processing equipment throughout the world. We have built our reputation on quality machinery, expert service, and replacement parts. Call us. Together, we'll select the best system to meet your processing needs.
