

Model D Shrimp Deveiner

**Laitram
Machinery**

Stainless steel perforations in drum wall separate veins from edible meats.

Blades cut shrimp backs to expose veins.

The Laitram® Model D Shrimp Deveiner will remove the vein from raw, peeled shrimp. Shrimp are flumed directly to the Model D for processing or can be flumed around it if deveining is not required.

NO HANDLING OR GRADING NEEDED

Operator contact is not required as shrimp position themselves automatically during the deveining process. Pre-grading is not necessary, and all shrimp are deveined simultaneously.

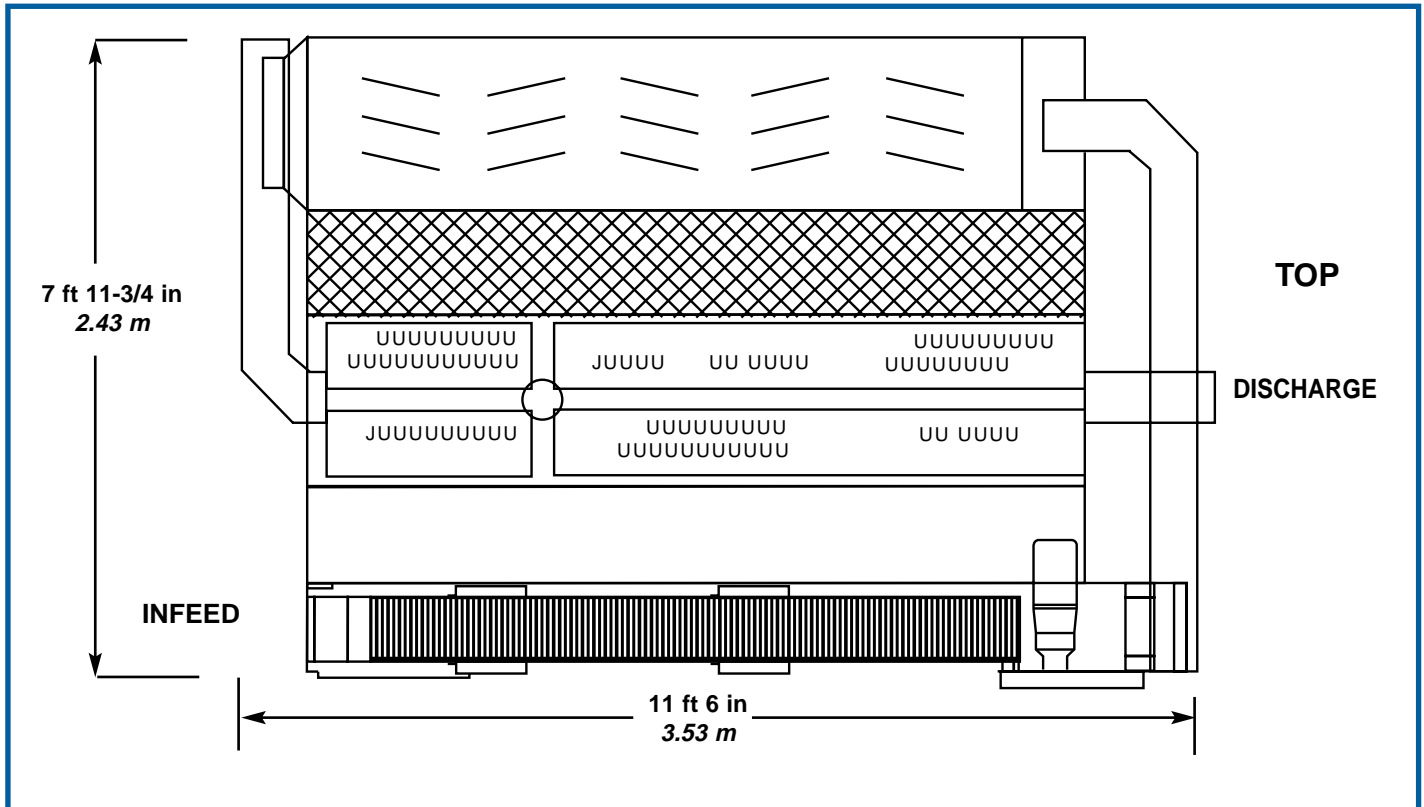

EASY TO OPERATE AND CLEAN

Like all Laitram equipment, the Model D is constructed of stainless steel and is easy to clean. Once initial adjustments are made, it requires little or no supervision. All components are precision machined and assembled.

LAITRAM QUALITY

Since 1949, Laitram has been a supplier of food processing equipment throughout the world. We have built our reputation on quality machinery, expert service and replacement parts. Call us. Together, we'll select the best system to meet your processing needs.

Model D Shrimp Deveiner

Specifications

Floor Space:
6 ft 6 in x 11 ft 6 in; 76 ft²
(2 m x 3.5 m; 7.06 m²)

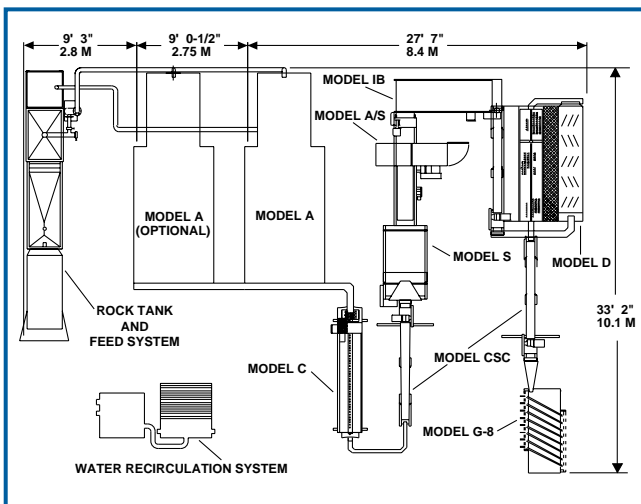

Power:
Available in most major voltages, including 208/220/240/480 V (60 cycle), and 380 V (50 cycle); 3 phase. Two (2) 1 hp motors and one (1) 1.5 hp motor included.

Water:
20 gallons per minute (75 LPM). 1 in (25 mm) supply line required.

Net Weight:
1050 lb (476 kg)

Approx. Gross Shipping Weight:
2100 lb (953 kg)

Specifications are subject to change without notice.

TYPICAL PLANT LAYOUT

Suggested arrangement of a complete Laitram Model A shrimp processing line. Total floor space required with one peeler is approximately 900 ft² (84 m²). Each machine in the line can process the output of two Model A Automatic Shrimp Peelers (the second peeler is optional).
